## Objective

---

Having 2 of years of knowledge in Selenium and Testing with basic knowledge on Java. I have a good grasp of both manual and automated API testing (Rest Assured), and test case writing. In addition to my proficiency with Excel sheets, I also possess a understanding of Web Drivers, X Paths, Power Bi, and SQL fundamentals. My goal is to improve my knowledge and abilities.

## Education

---

- Vel Tech University** 2022  
Bachelor of science and technology  
7.4 CGPA

## Skills

---

- Java
- Web and Api Automation
- TestNg
- SQL
- Selenium
- BDD Cucumber

## Tools

---

- PowerBI desktop
- Eclipse
- Visual studio code
- Postman
- MySQL workbench

## Experience

---

- Cognizant technology solutions** Feb 2022 - Jun 2022  
Intern  
-Trained in Web automation, Selenium, Locators, Test Cases and Java Basics  
-Finished API Testing with Postman and received Rest Assured Training  
- Completed Amazon Web Automation as a component of a Mini Project  
- As Part of Primary Project completed Web Automation for Cognizant Apps.
- Cognizant technology solutions** Aug 2022 - Present  
Programmer analyst  
-Worked on Functional Testing As Part of Rabo-Bank Incubate Program  
- Implementing the test design as per requirement.

## Certifications

---

- Selenium WebDriver with Java -Basics to Advanced+Frameworks**  
-Demonstrate methods and best practices that align java and opps concepts , selenium framework and test ng library and also data driven testing with hands on experience. Able to design pageobject model from scratch
- Manual Software Testing + Agile with JIRA Tool**  
Learned about manual testing basics, types, STLC, terminologies, Agile methodology, Agile Model & SCRUM, and how to work with JIRA. Familiarized with Agile Model and SCRUM.
